

EXCELLENCE IN SAFETY AWARD

The **CCS Excellence in Safety Award** is designed to recognize companies that demonstrate an outstanding commitment to safety performance through robust written safety programs. It is the highest honor that CCS can bestow on a company.

The submission process will require each company to prepare a written submission addressing the five (5) questions on the last page of this submission document. The panel of judges will review submissions and then conduct a 20-minute interview with each submitting company. The judges then will determine the top 8-10 submissions who will then have an unannounced site visit conducted by Gary Martin, CCS Safety Director, during a designated two-week time span. The top companies will be asked to provide CCS with three job sites available for a visit during the designated timeframe.

Based on the interview and site visit data the judges' panel will unanimously select the top five who will be recognized as Safety Leaders with the most outstanding being presented the coveted "Crystal Eagle" Excellence in Safety Award.

Winners will be announced at the Annual CCS Awards Celebration on *April 24, 2025* at the Scottish Rite Cathedral in Indianapolis.

Qualifying companies must be involved on a construction team.

Documentation Needed

- Submission document with responses addressing the five (5) questions to demonstrate how the company is addressing safety performance
- 2024 OSHA 300 & 300A Logs

SUBMISSION QUESTIONS

CCS EXCELLENCE IN SAFETY AWARD

Below are questions that should be answered in your written submission. The total length of the responses should not exceed five (5) pages.

To be considered for the CCS Excellence in Safety Award, you will be required to participate in an interview with our judges' panel based on your responses to the questions below. The interview may be done in person or via web conferencing and may include up to three attendees. The interviews will occur on February 27 & 28 at the CCS Office in Indianapolis.

1. How has your safety program evolved over the last three to five years? How were you able to accomplish these changes and how have they resulted in improved safety performance?
2. What one thing have you implemented over the last year that has impacted your safety performance and culture? What was the catalyst to make that change?
3. How do you ensure engagement with your safety program from all levels of your organization to instill a robust safety culture?
4. What is the #1 leading indicator for safety in your organization and how have you addressed it?
5. What is your proudest safety accomplishment in the last year?
